

It is my understanding that the FCC may force K-Love on FM 105.5 in Phoenix, AZ off the air because of a new LPFM station. K-Love is a great station that my family and I listen to every day. It is one of the only alternatives available that we can listen to that has wholesome programming and it would be devastating to the local community if the programming were forced off the air. The programming is important because it offers hope and encouragement to those searching for something different. Please do not remove K-Love from the air.

Thank you,
Ron Mellinger
